Section 3: Critical Skill Analysis

Your critical skills ARE YOUR WEAKEST SKILLS based on the number of questions you answered incorrectly or left blank. Work on these skills first to raise your score the most in the least amount of time! Begin with your weakest math skills, then your 2 weakest reading skills and finally your 2 weakest writing skills. If you have time, also work on your remaining critical reading and writing skills. Be accepting and use as few more questions correctly in each critical skill the next time you take the SAT, you'll raise your score by more than 100 points.

Crit. Read	Math	Writing
Making Inferences	Reasoning with Evidence	Command Usage and Mechanics
Defending	Coordinate Geometry	Sentence Construction
Text Development	Algebraic Information	Organization and Development
Packing the Main Idea	Basic Math Skills	
	Linear Equations	
	Number Properties/Counting	

Section 4: Complete Skill Breakdown Analysis

The following is a complete breakdown of your performance on each of the skills tested by the SAT. After you finish working on your critical skill you may want to work on additional skills to raise your score even higher.

Math	Right	Wrong	Blank	Crit. Read	Right	Wrong	Blank
1. Basic Math Skills	4	0	0	11. Critical Reading	2	7	1

This program gives you the ability to just score the three verbal sections or the three math sections if you just want to concentrate on one part of the SAT.

If you realize you made a mistake entering your answers, you can go back, fix the answers, and then score the section again. The Coach program will count this as a "try."

If your school is not using the WritePrep automatic essay grader, click here to enter your hand-graded essay score so it can be factored in to your overall writing score.
